Café Barriers
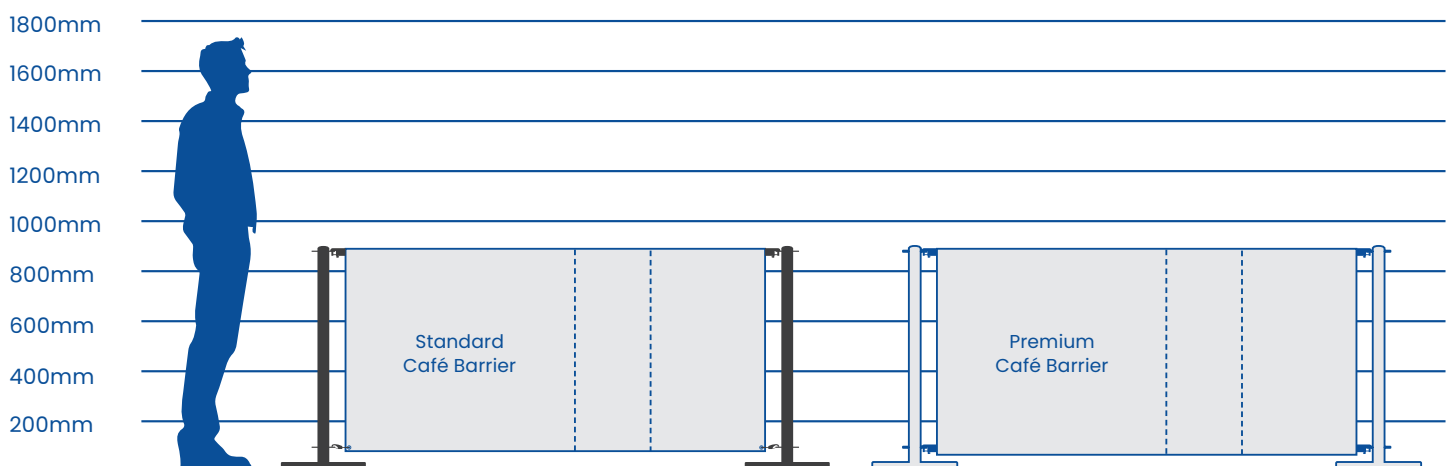

Technical Specifications

Size Guide

Minimum: 850mm x 885mm   Maximum: 1850mm x 900mm

Note: Size does not include the frame

Standard Café Barrier

Premium Café Barrier

Assembly Instructions

Follow these straightforward steps to secure your café barrier effectively:

- Place the weighted bases where you want your barrier to stand. Ensure they're evenly spaced for stability.
- Secure the poles onto the bases by aligning the holes and tightening the screws. Make sure they're firmly fixed.
- Gently slide the fabric banner onto the crossbars, ensuring it's the right way up and smooth.
- For premium cage barriers, attach the crossbars with the fabric to the poles. Ensure they're level and secure.
- For standard café barriers, attach the top crossbar with the fabric to the top of the poles then hook the bungee cords through the bottom eyelets of the fabric and attach to the bottom of the poles. Adjust the tension to keep the fabric taut but not over-stretched.
- Give everything a little wiggle to check stability and make any necessary adjustments.

Care Instructions

To maintain the quality and longevity of your café barrier:

- Clean regularly with a damp cloth to remove dirt and debris.
- Avoid harsh chemicals or abrasive cleaning materials.
- Store rolled (not folded) in a cool, dry place when not in use.
- Ensure careful mounting during installation to minimise damage.

For UFabrik Flag Textile and Stretch Fabric

- Machine wash on a gentle cycle with cold water and mild detergent.
- Do not tumble dry; air dry only to maintain fabric tension.

Additional Information

Materials Information

110gsm UFabrik Flag Textile
Strong, cold cut, PVC free, recyclable, REACH compliant and excellent show through.
Substrate: DIN 60001,ASTM D7641 – 100% polyester
Weave: knitted
Weight: ISO536 - 110gsm, 3.2oz/yd
Shrinkage: 190°C/60s - <2%
Fire retardancy: B1/NFPA 701 - EN13501-1/DIN 4102-1
Recommend Fixation Temperature: 190-200°C,45-60s
Yellowing Temperature: ≥210°C

440gsm Banner PVC
Description: Laminated PVC banner material; water-resistant and weatherproof.
Tensile Strength: Warp 635 / Weft 451 N/5cm
Tear Strength: Warp 125 / Weft 107 N
Temperature Resistance: -20°C to 70°C

260gsm Stretch Fabric
F/Flex Tissaro Flex One-Way Stretch Display Fabric 260gsm
Flex is a super supple fabric, perfect for punchy prints on stretch frame systems. It produces accurate and appealing graphics that don't distort when stretched.

100% polyester design
Fire: DIN fire-rated
Weight: 260gsm
Denier: 150 x 70
Weave method: Warp-knitted
Fixation temperature: 190-210°C, 1-2 min
Yellowing temperature: >210°C \

Additional Information
